

SL ENGINEERING AND TRANSPORT

Company Profile

ABOUT US

In 2017, SL Engineering & Transport Pvt Ltd was established with the primary objective of contributing to the country's infrastructure and civil engineering construction. Despite our recent registration, we have been active for over five years, and have successfully executed several projects in Colombo and across the country.

We are committed to ensuring the timely delivery of our projects without compromising on quality. Our engineering expertise has been instrumental in upholding this commitment. Moreover, our team of highly qualified Engineers is equipped to handle projects in the most remote and challenging locations throughout the country.

SL Engineering is the leading sheet piling specialist in Sri Lanka. The company is owned and operated by the Managing Director, K. H. A. S. D. Kumara.

:

VISION

“Providing Exceptional and Reliable Service Above All Else.”

MISSION

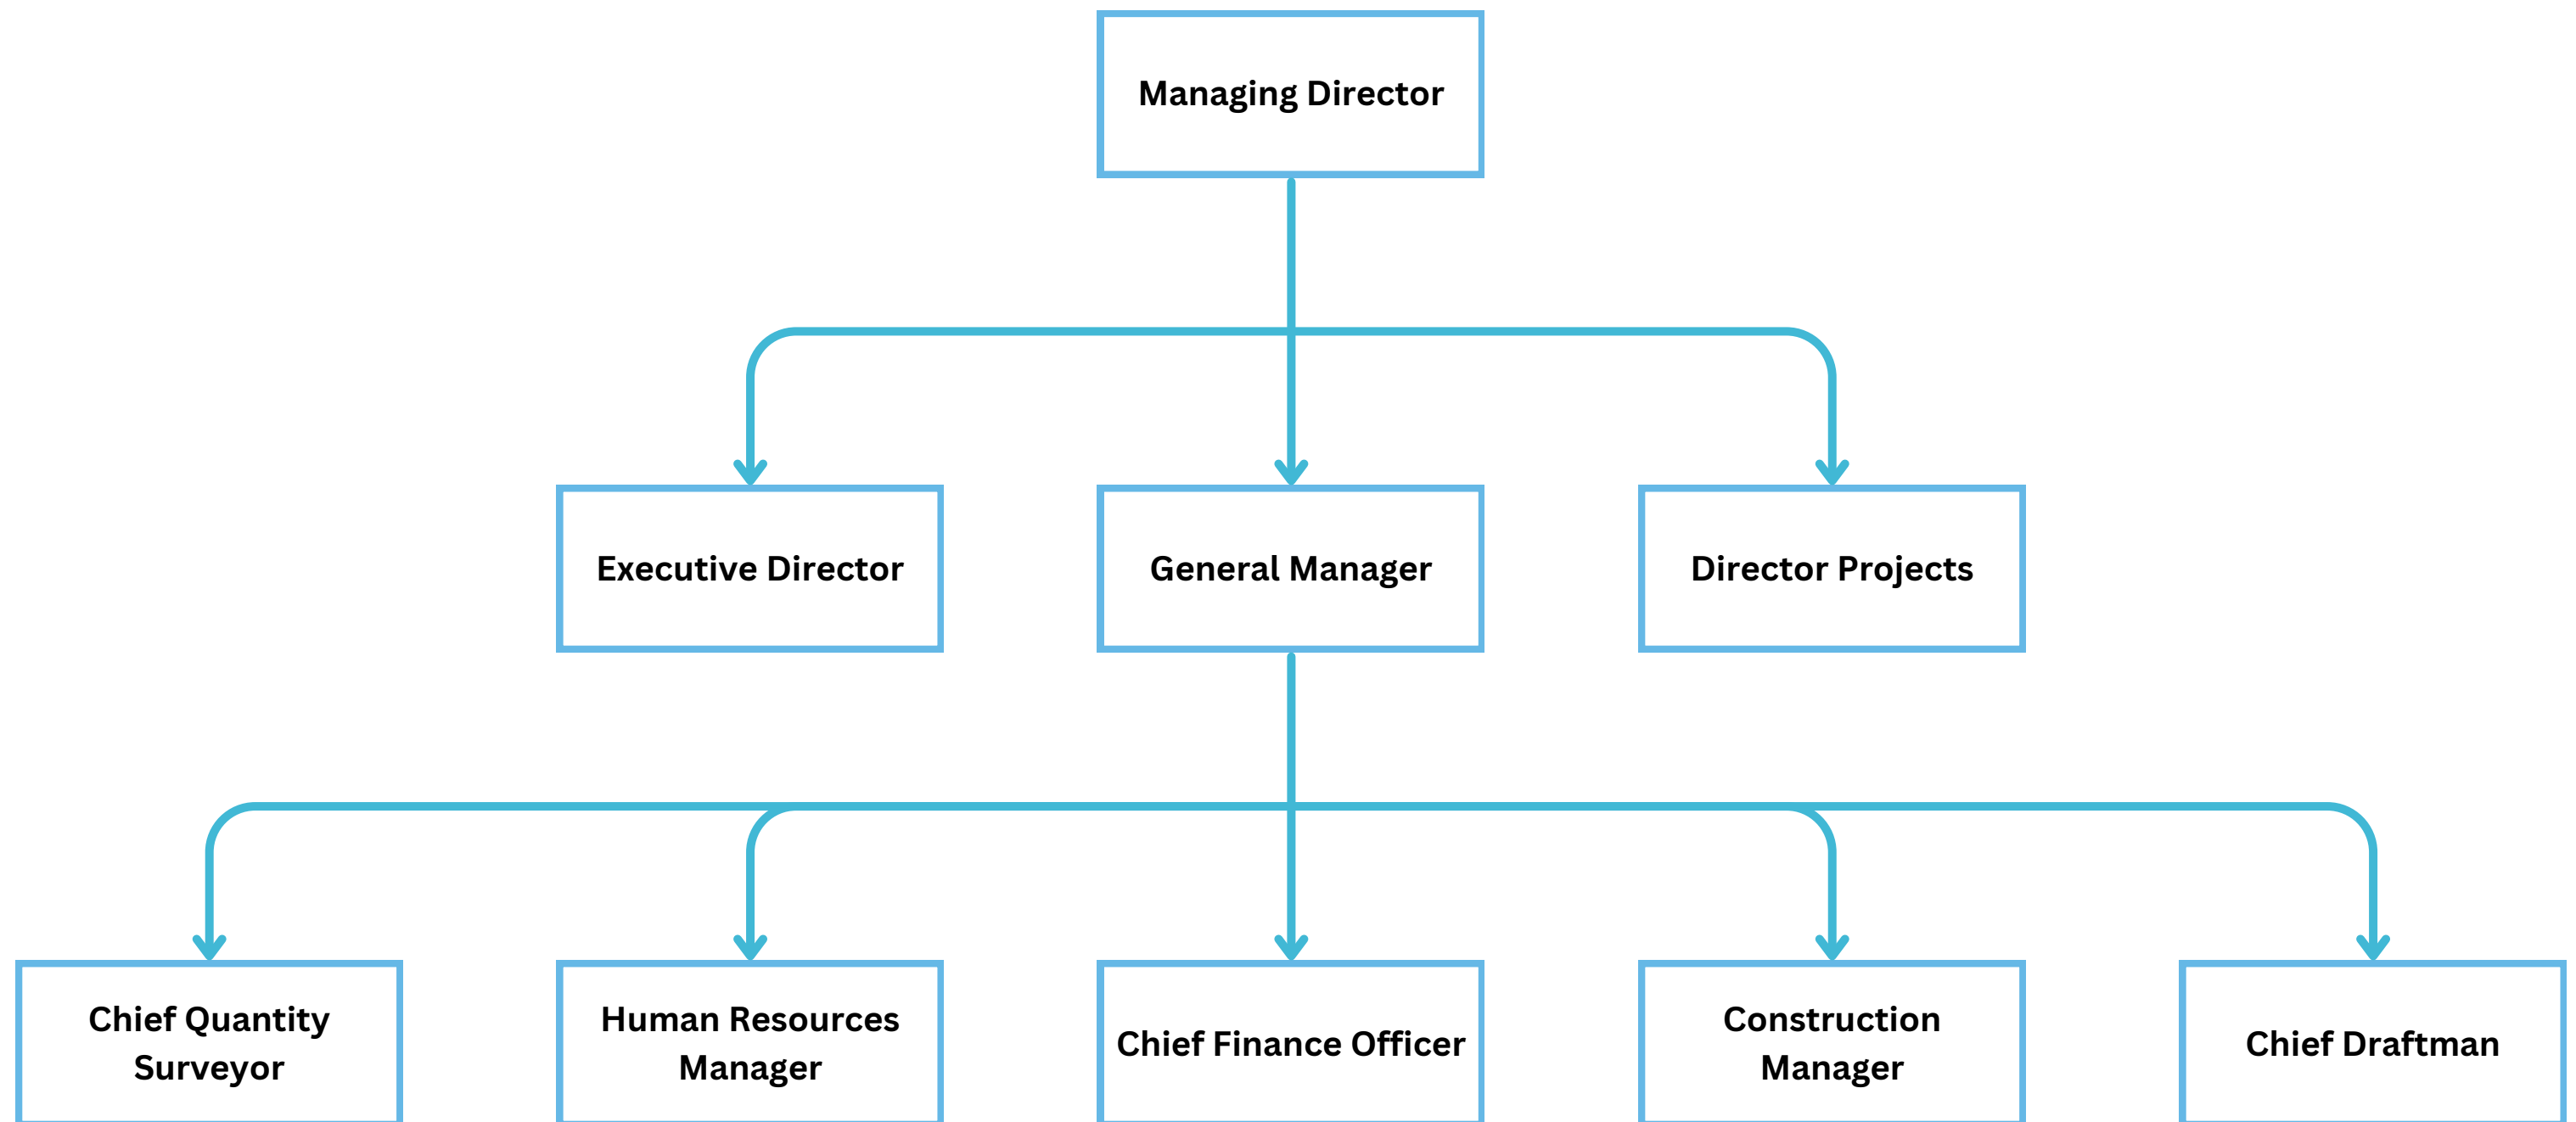

Commitment to Sustainability and Stakeholder Value Creation

Our organization is dedicated to sustainability, safety, and quality, consistently exceeding client expectations by partnering with strategic players. We promote a culture of excellence and equality, based on merit and equal opportunity.

DIRECTOR'S MESSAGE

The construction industry plays a critical role in connecting individual development to a country's economic sustainability. Each construction firm carries the responsibility of representing a sector in this vital role by increasing employment opportunities and contributing to the evolution of the country's infrastructure. While our firm has established a strong reputation through building numerous homes and buildings, we take great pride in prioritizing our clients' expectations by establishing a close bond with them. We believe that it is not just a face-to-face encounter, but a heart-to-heart construction rendezvous.

Our company's humble beginnings date back to 2016, and we have since cemented our core values around three pillars: striving for excellence, hard work, and upward sustainability. As aspiring construction engineers, we take pride in gifting great constructions to the nation while instilling trust and reliability among our clients through the most promising process of construction we could implement over the years.

It is crucial to recognize that, for everyone in the SL Engineering and Transport family, construction is more than just a business; it is an approach to a better lifestyle for both clients and the company's members providing the services.

At SL Engineering and Transport, our engineering design expertise has been honed over two decades and has been integral to our success in large-scale construction projects. Our commitment to economic, social, and environmental accountability has earned us the trust of clients across various sectors throughout the country. We take pride in being recognized at esteemed construction evaluation award ceremonies for our quality creations marked by authentic accuracy in our work.

With each project, we gain valuable experience that presents opportunities for expansion and acknowledgement of our capabilities. We constantly strive to improve our performance and review our compliance to ensure we meet our ultimate goal of building the perfect home for you.

K. H. A. S. D. Kumara
Managing Director

WHAT WE DO

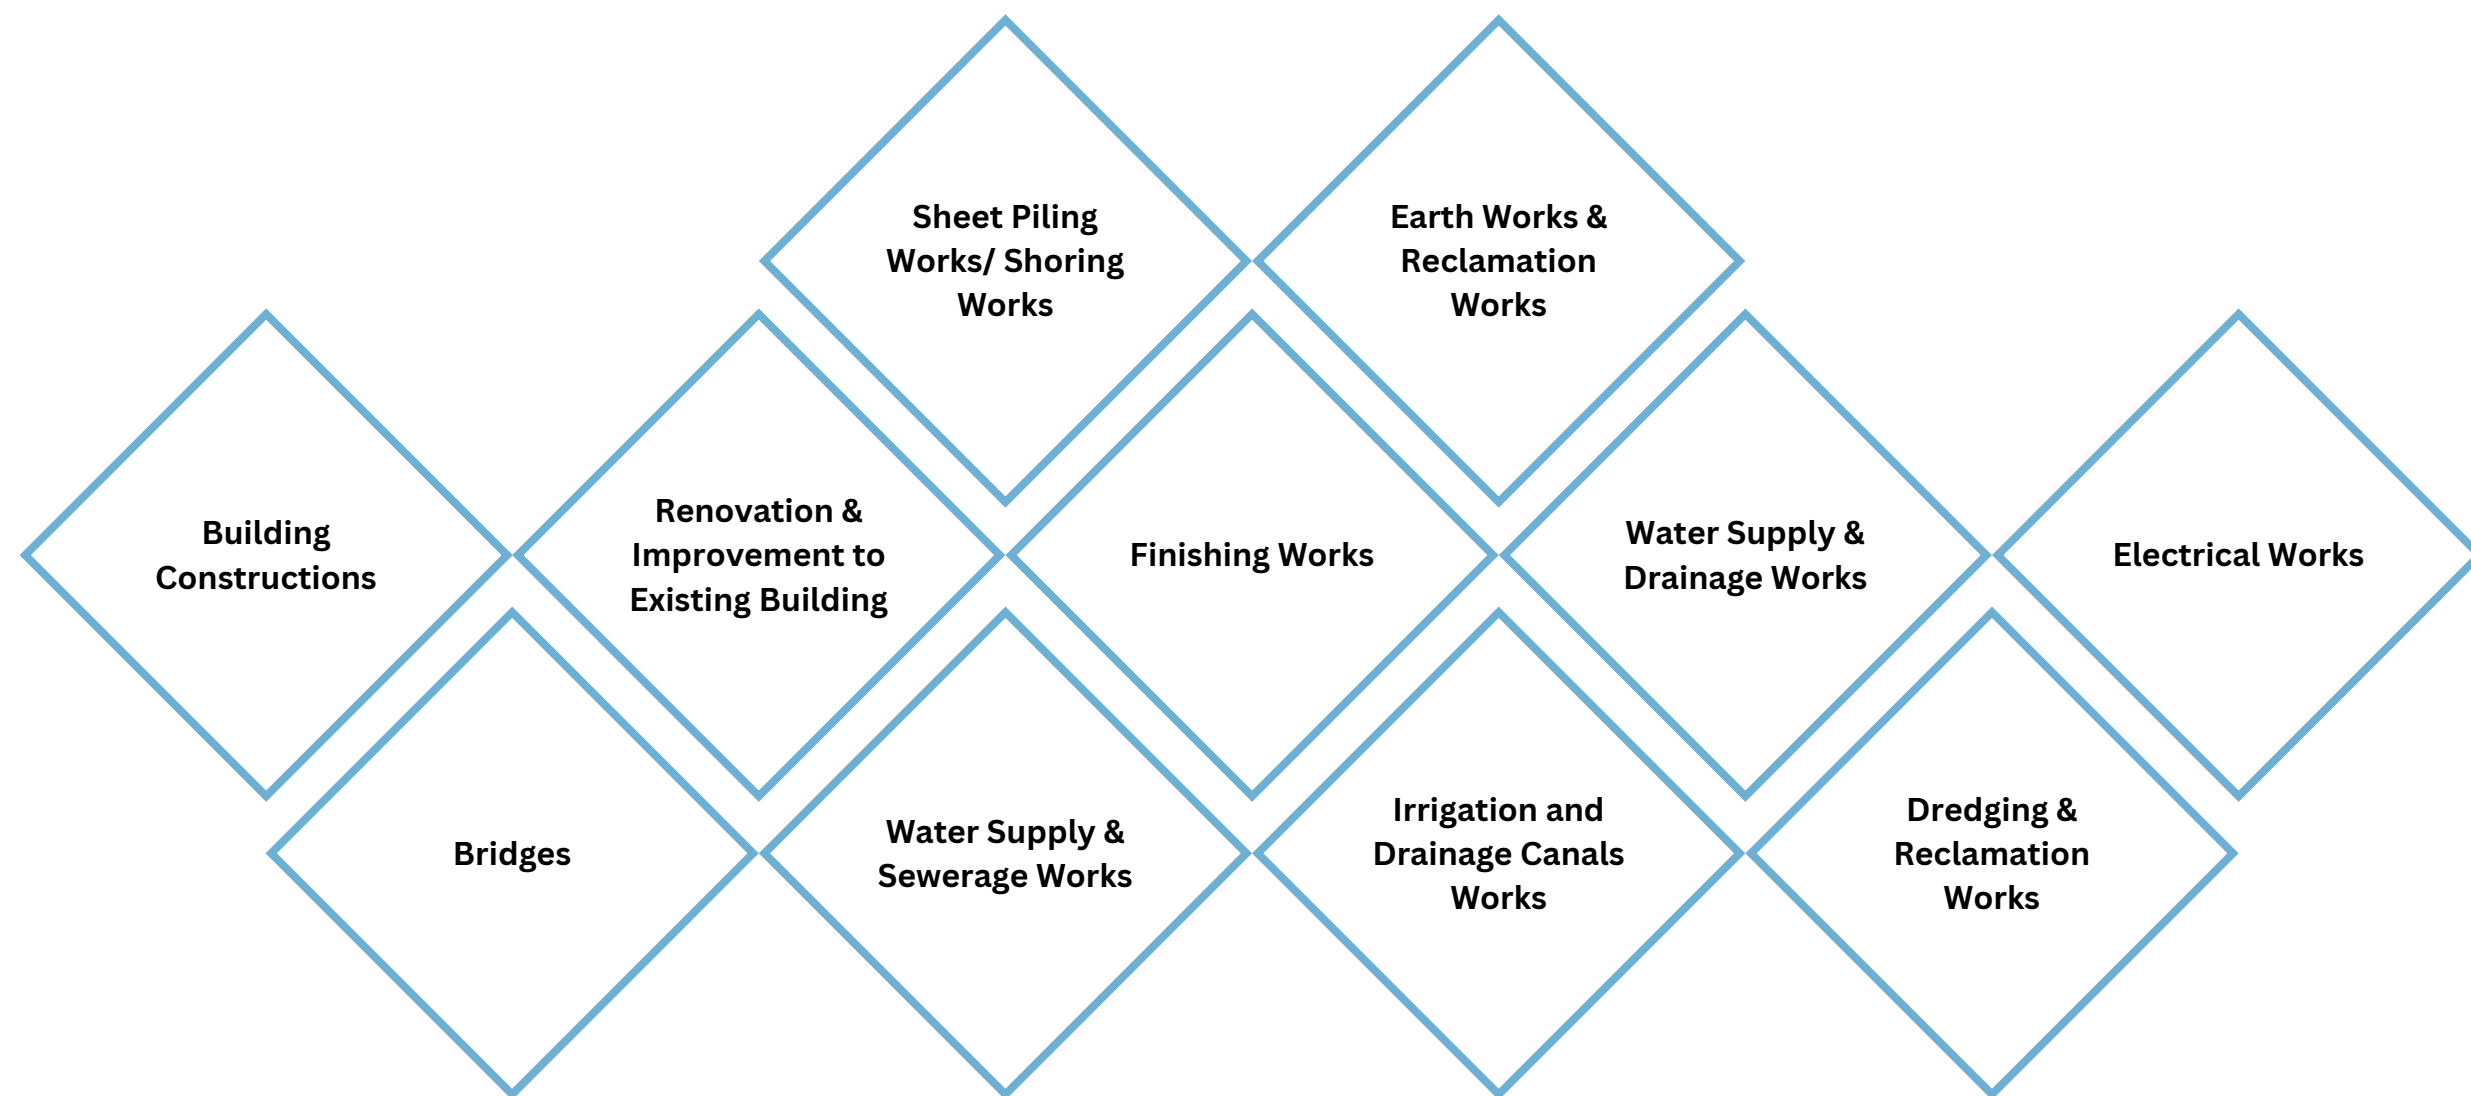

SL ENGINEERING AND TRANSPORT (PVT) LTD.

Introducing SL Engineering and Transport (PVT) Ltd., a top construction company in Sri Lanka established in 2017. With its impressive CIDA (ICTAD) C4 grading, the company is well-equipped to handle large-scale projects with ease and efficiency.

SL Engineering and Transport is a distinguished construction company in Sri Lanka, having successfully accomplished more than 300 projects, cumulatively worth over Rs. 10 billion.

At SL Engineering and Transport, we place a strong emphasis on our clients' requirements and make swift decisions to cater to customer traffic, ensuring the industry's sustainability. Our priority is to provide top-quality products to our customers while prioritizing safety.

ECONOMIC STRENGTH AND RESPONSIBILITY

Finance is a fundamental pillar of SL Engineering and Transport (PVT) Ltd, and a vital component for achieving business success. In contemporary times, finance departments are expected to play a multifaceted role within and beyond the organization. The efficient management of finances is crucial to the overall performance and prosperity of SL Engineering and Transport (PVT) Ltd. Maintaining a vigilant eye on the financing function is imperative to the seamless operation of a company. A finance department's responsibilities encompass an extensive range of activities, from basic bookkeeping to providing valuable insights to support managerial decision-making.

In addition to managing financial records, the finance department is also accountable for ensuring sufficient cash flow to facilitate day-to-day transactions. This includes developing credit and collection policies to ensure timely payments from clients and suppliers.

The finance department plays a pivotal role in facilitating managers' strategic decision-making. They provide crucial information relating to market opportunities, project feasibility, and payback periods for significant capital investments. Utilizing specialized financial evaluation techniques, the finance department offers an objective perspective that serves to enhance the accuracy and effectiveness of such decisions.

HOW WE STANDOUT

**Passion on Engineering drives us**

We are eager to do challenging, unique Engineering Marvels our passion towards successful projects makes us experts on what we do.

Honesty and integrity in all we do

We do the right thing even when no one is looking or ever find out and never compromise our integrity and are accountable on what we do.

Safe working environment makes us safe and others

We do projects to benefit the mankind and its ecosystem, and adopt the best safety practices to protect people and properties.

Projects are Unique and achieved with the Team

No projects has ever been successful being the teams working apart. Teamwork is what allows us to accomplish our goals.

Quality Products & Services are our sails

Quality is a cost, and we are paid for it. The Quality of our products and services are in its paramount importance and would be the messenger of us.

HUMAN RESOURCE ENGAGEMENT AND RESPONSIBILITY

"The primary reason for our success is our team's collective experience and collaborative efforts."

Maintaining a positive relationship with our employees is a crucial aspect of our operations, as it greatly impacts our delivery performance and the quality of work we produce. To achieve this, we prioritize monitoring our staff turnover ratio, refining our hiring and development process, and investing in training and qualifications to instill confidence and ensure high levels of quality and responsiveness.

The process of hiring and developing employees adheres to strict procedures and protocols to ensure the highest level of customer satisfaction and to maintain a consistent record of repeat business from our clients.

We hold the belief that qualified employees serve as a valuable asset not only to the company but also benefit our customers and the industry in both the short and long term.
